

ERGA WANDA AFRIZA

Full Stack Developer & AI Engineer

ewandaafriza@gmail.com | +62 882-9106-7259 | github.com/ErgaWanda | <https://ergaporto.netlify.app/>

PROFESSIONAL SUMMARY

Full Stack Developer and AI Engineer with a Bachelor's degree in Information Technology (GPA 3.23/4.0). Delivered 7 end-to-end web and machine learning projects, including a live production certification platform and multiple NLP-based sentiment analysis systems. Skilled in building scalable backends with Golang and Laravel, responsive frontends with Vue.js, and deploying containerized applications with Docker. Experienced integrating machine learning models (BERT, Naive Bayes, Random Forest, XGBoost) into practical, user-facing products.

CORE SKILLS

- Programming Languages: JavaScript, Golang, Python, Kotlin, HTML, CSS
- Backend & Frameworks: Golang (Echo), Laravel, CodeIgniter, Node.js
- Frontend: Vue.js, Tailwind CSS
- Databases: PostgreSQL, MySQL, Redis
- AI & Machine Learning: Computer Vision, Sentiment Analysis, CNN, Naive Bayes, BERT, Random Forest, XGBoost
- DevOps & Architecture: Docker, Nginx, Git, Postman, RESTful API Design, MVC Pattern

WORK EXPERIENCE

Full Stack Developer | LSP CoachPro Indonesia (Maganghub Kemnaker Program)

December 2025 – June 2026

- Architected and developed an end-to-end certification management platform from scratch, digitizing the full workflow from pre-assessment to final competency decisions for a national government training program.
- Built a scalable backend with Golang and PostgreSQL, implementing Redis caching to noticeably reduce API response time and support concurrent access during peak usage.
- Deployed and maintained the production system using Docker and Nginx on a VPS, ensuring stable, continuous uptime for end users.
- Designed a responsive Vue.js interface that streamlined the certification review process for administrators and assessors.

Software Engineer Intern | Pusdatin, Ministry of Defense of the Republic of Indonesia

June 2024 – December 2024

- Designed and delivered 3 internal management systems (Employee Information Portal, Activity Calendar, Daily Report System) within a 6-month internship using Laravel, Vue.js, and MySQL.
- Digitized employee record management across multiple departments, replacing manual, paper-based processes and speeding up data retrieval.
- Implemented real-time synchronization for departmental event scheduling, reducing manual coordination and minimizing scheduling conflicts.
- Automated daily activity reporting, replacing manual paperwork and improving the speed and accuracy of supervisor evaluations.

PROJECTS

CoachPro Certification Management System — sertifikasi.coachpro.id

Tech Stack: Golang (Echo), Vue.js, Tailwind CSS, PostgreSQL, Redis, Docker, Nginx

- Architected and launched a live, in-production certification platform used by the Maganghub Kemnaker program.

- Optimized backend performance using PostgreSQL and Redis caching, reducing query latency under load.
- Streamlined deployment with Docker and Nginx for consistent, repeatable releases.

Website Sentiment Analysis — Universitas Darma Persada

Tech Stack: Python, Naive Bayes, MySQL, Vue.js

- Built a web-scraping and machine learning pipeline to classify public sentiment toward Universitas Darma Persada from online text data.
- Designed an interactive Vue.js dashboard visualizing real-time sentiment trends for stakeholders.

Sentiment Analysis: Shell vs. Pertamina Purchase Policies

Tech Stack: Python, BERT, Transformers

- Fine-tuned a BERT-based NLP model to analyze public sentiment on fuel purchase policy changes, capturing nuanced context beyond simpler classification methods.

Algorithm Comparison for Instagram Engagement Optimization — PT. BRIllian Indah Gemilang

Tech Stack: Python, Random Forest, XGBoost, Vue.js, PostgreSQL

- Built a predictive analytics tool benchmarking Random Forest against XGBoost to identify the higher-performing model for engagement prediction.
- Analyzed social media data to generate actionable recommendations for increasing Instagram engagement.

Employee Information Portal — Pusdatin, Ministry of Defense

Tech Stack: Laravel, Vue.js, MySQL

- Developed a centralized portal to manage employee data and streamline information access across departments.

Departmental Activity Calendar System — Pusdatin, Ministry of Defense

Tech Stack: Laravel, Vue.js, MySQL

- Built a real-time scheduling system to coordinate official events and departmental activities.

Daily Employee Activity Report System — Pusdatin, Ministry of Defense

Tech Stack: Laravel, Vue.js, MySQL

- Digitized daily reporting, replacing manual paperwork and improving data accuracy for internal evaluations.

EDUCATION

Bachelor of Information Technology

Darma Persada University | 2021 – 2025

GPA: 3.23 / 4.00
