ewandaafriza@gmail.com | +62 882 9106 7259 | <https://github.com/ErgaWanda>

PROFILE

Versatile tech professional combining expertise as a Full Stack Developer and AI Engineer. Recent Information Technology graduate with a strong foundation in building end-to-end web architectures and integrating machine learning models into practical applications. Adept at bridging the gap between sophisticated artificial intelligence algorithms and scalable, user-centric web solutions. Proven ability to deliver comprehensive projects from conceptualization to deployment.

EDUCATION

Darma Persada University

2021 - 2025

Bachelor of Information Technology

Cumulative GPA: 3.23/4.0

WORK EXPERIENCE

Pusdatin Kementerian Pertahanan RI (Ministry of Defense)

Jun 2024 - Dec 2024

Software Engineer Intern

- Designed and implemented a suite of internal management applications using Laravel, Vue.js, and MySQL.
- Delivered an Employee Information Portal, an Activity Calendar System, and a Daily Report System to digitize and improve internal workflow efficiency.

LSP CoachPro Indonesia (Maganghub Kemnaker)

Des 2025 - Present

Full Stack Developer

- Developed an end-to-end certification management platform for the Maganghub Kemnaker program, managing workflows from pre-assessment to final competency decisions.
- Implemented a robust and scalable architecture using Golang, Vue.js, PostgreSQL, and Redis, successfully deploying the application using Docker and a VPS.

SKILL

- Programming Languages: JavaScript, Golang, Python, Kotlin, HTML, CSS
- AI & Data Science: Machine Learning, Computer Vision, Sentiment Analysis, CNN, Naive Bayes, BERT
- Backend Frameworks: Laravel, CodeIgniter, Node.js
- Frontend Frameworks: Vue.js
- Databases: PostgreSQL, MySQL, Redis
- API & Architecture: RESTful API Design, Third-Party API Integration, MVC Pattern
- DevOps, Tools & Environment: Docker, Git, Postman

PROJECT

CoachPro Certification Management SystemTech (<https://sertifikasi.coachpro.id>)

Stack : Golang (Echo), Vue.js, JavaScript, Tailwind CSS, PostgreSQL, Redis, Docker, Nginx

- Architected and developed a comprehensive web-based platform to manage professional certification workflows.
- Built a high-performance backend using Golang and the Echo framework, paired with a responsive, user-friendly frontend utilizing Vue.js and Tailwind CSS.
- Optimized data storage and caching with PostgreSQL and Redis, and streamlined deployment processes using Docker and Nginx.

Website Sentiment Analysis for Universitas Darma PersadaTech

Stack: Python, Naive Bayes, MySQL, Vue.js

- Engineered a web application to scrape and analyze public sentiment regarding Universitas Darma Persada.
- Implemented a machine learning pipeline using Python and the Naive Bayes algorithm for accurate text classification.
- Designed an interactive frontend dashboard using Vue.js to visualize sentiment data stored in MySQL.

Sentiment Analysis on Shell vs. Pertamina Purchase PoliciesTech

Stack: Python, BERT, Transformers

- Conducted advanced Natural Language Processing (NLP) to evaluate public perception and sentiment regarding the restrictions/cancellations of Shell purchases in relation to Pertamina.
- Utilized state-of-the-art BERT (Bidirectional Encoder Representations from Transformers) models to achieve high accuracy in understanding complex contextual sentiment from web data.

Algorithm Comparison for Instagram Engagement Optimization (PT. BRILLIAN Indah Gemilang)Tech

Stack: Python, Random Forest, XGBoost, Vue.js, PostgreSQL

- Developed a predictive analytics web tool to evaluate and compare the performance of Random Forest and XGBoost algorithms.
- Processed and analyzed social media data to provide actionable insights for increasing Instagram user engagement.
- Built the analytical backend in Python, integrated with PostgreSQL, and displayed the comparative metrics through a clear Vue.js interface.

Employee Information Portal System (Pusdatin Kementerian Pertahanan RI)Tech

Stack: Laravel, Vue.js, MySQL

- Developed a secure and efficient web-based portal to manage internal employee data and streamline information accessibility across departments.
- Integrated a robust backend using Laravel with a responsive Vue.js frontend to ensure a seamless user experience.

Departmental Activity Calendar System (Pusdatin Kementerian Pertahanan RI)Tech

Stack: Laravel, Vue.js, MySQL

- Built an interactive, centralized web application to efficiently schedule, track, and manage official events and departmental activities.
- Implemented real-time data synchronization between the frontend interface and the MySQL database.

Daily Employee Activity Report System (Pusdatin Kementerian Pertahanan RI)Tech

Stack: Laravel, Vue.js, MySQL

- Engineered a digital reporting system designed to log daily tasks and monitor staff productivity.
- Digitized the traditional reporting workflow, improving data accuracy and making internal evaluations more efficient.
